

BH Architecture & Design™ Eliminates Surprises in the Design and Construction Process

BH Architecture & Design™ has a dedicated team of in-house designers and architects dreaming up a “vision” for spaces that today’s residents love to call home.

Our innovative, in-house design process is front-loaded prior to acquisition. It starts with a two-day development meeting on-site with BH design, architectural, and construction professionals who create an interior and exterior rehab package with scopes and contracts ready upon acquisition.

From conception through installation, BH Architecture & Design transforms tired spaces into modern amenities that are the focal point of a community.

Blends “design thinking” into construction and renovation roadmap to drive value over time

Eliminates surprises in the design and construction process with 3D photorealistic images

Gets precise bids for all the necessary materials for detailed specifications and scope books

Creates a modern feel with designer-recommended furniture and accessories at the best possible price

Design with the modern resident in mind.
